FRANKLINIA ALATAMAHA. A large shrub or small tree with large, fragrant, white flowers and deep orange stamens. Blooms in early fall.

CAMELLIA SASANQUA, ROSEA. Wonderful for its late fall and early winter blooms.

You Should Grow

The Rare Franklinia

(Franklinia Alatamaha; Gordonia Alatamaha)

One of Our Best Sellers

Franklinia have proved hardy in Toledo, Ohio for past four years.

Our sales of Franklinia have increased more in the past three years than that of any plant we sell. It is one plant most every one wants once they see it and they tell their friends about it too.

This exquisite fall-flowering tree was brought in 1777 from the banks of the Alatamaha River in Georgia to Bartram's garden at Philadelphia. John Bartram, recognizing its extraordinary beauty and value, named it in honor of his life-long friend, Benjamin Franklin.

The original grove of Franklinia trees was again visited in 1790, but from that day to this no one has seen these trees growing in the wild, though many expeditions have searched the banks of the Alatamaha for them.

Franklin's tree is beautiful in detail and marvelous in landscape effect, besides blooming at a season when few shrubs or trees are in flower.

The slender trunk and graceful branches are so muscular and sinewy in appearance that one almost expects motion as under a greyhound's skin. The bark is smooth and dark gray, with wavering lengthwise markings of lighter color.

Each twig develops at its tip a cluster of buds of graduated size, like overgrown greenish pearls. Early in August the largest of these attain the size of marbles. Then the guard petal folds back, still retaining its firm spherical form. From this shelter emerge four other petals, satiny, snowy white, elaborately frilled and pleated. The snowy, frilly chalice, three inches in diameter, holds a sumptuous mass of orange-gold stamens and breathes forth a delicate, balmy fragrance.

Each flower lasts two or three days and then drops cleanly. **There is a constant succession of bloom till hard frost.** We frequently get the unusual effect of a tree clad in crimson autumn foliage and abundantly starred with white flowers.

The Franklinia begins blooming when not more than 3 or 4 feet high. Young trees under favorable conditions increase in height a foot or more each season. Specimens 30 feet high are known. It develops naturally with several trunks, but may easily be trained to a single trunk by removing the sprouts which start from the base.

Franklinia prefers full sun, has proved entirely hardy about New York and hardy in favorable locations about Boston. It is an especially desirable tree for the small intimate garden, loved and lived in. It is a charming lawn tree and the grass may be allowed to grow closely about the trunk. It also thrives when planted by pools, lakes and streams. Its light elegance of form and color contrasts exquisitely with the dark green of conifers.

This nursery was started just 47 years ago by the present owner. We have made many mistakes but we believe our customers will agree that we have always tried to give a dollar in value for every dollar received. This will be our aim as long as The Tingle Nursery Co. stays in business. If you have any reason for complaint, tell us.

Business Information

Not open on Sundays. Open on Saturdays by appointment only. Open all day balance of week.

THESE PRICES are in effect Spring 1953.

PRICES named in this Trade List apply only to orders placed by nurserymen, florists and dealers. Maryland customers are subject to 2% sales tax or send your License Number. All delivery costs are to be paid by purchaser.

PACKING. All goods are packed in boxes and bales for which we charge sufficient to cover cost of material used. We will add this cost to your invoice. **This cost applies whether you remit with order or buy on time terms.**

CLAIMS, if any, must be made immediately upon receipt of goods, and if just, made satisfactory, but in no case are we responsible for more than the purchase price of the stock in question. **We will not be responsible for failure to fill orders in full or for any damage or delay to stock after delivery to the transportation company.**

TERMS. We offer the usual terms: net 30 days from date of shipment to those of known responsibility **but must have satisfactory business references from others or remittance must accompany order.** Those desiring stock shipped C.O.D. will please remit **one-fourth** the amount of their purchase when ordering. Other terms by special arrangement.

NON-WARRANTY. We give no warranty, expressed or implied, the purchaser assuming all risk and responsibility of transportation, growth, planting, life of stock or any other matter on any stock we sell. We send out good stock, carefully grown and packed but cannot control conditions after it leaves our care. We exercise the greatest care to keep our stock true to name and are willing to replace on proper proof any stock that may prove otherwise, or refund the amount paid us for such stock, but it is mutually agreed that we shall not at any time be liable for any greater amount.

TELL US HOW TO SHIP, whether by express, motor truck or railroad freight. If by motor truck or railroad freight, tell us the route or over which line you want delivery made. If you do not give this information we will use our own judgment as to route and methods to use. **It is mutually agreed that whether you name the route or leave it to our own selection, we will not in any way be responsible for time or condition of delivery and our responsibility ceases upon our delivery to the transportation company.**

HARDINESS OF PLANTS. When hardiness of plants is mentioned herein it applies only to this section.

TIME OF SHIPMENT. We ship most every week in the year with the possible exception of during the winter when bad weather makes it impossible, although this is very seldom. Of course, there is a regular season for shipping the different plants, but if you want them out of season and are willing to take the risk of good delivery, we will pack with the utmost care and get them off to you at most any time you want them.

Plan to Visit Our Nursery

We will certainly be glad to have you come to see our stock for yourself. We believe you will find it compares favorably with that grown by other nurseries. Some of our customers have told us it is better than is furnished by some others. We are on the Eastern Shore of Maryland, 100 miles south of Wilmington, Delaware, 100 miles from Kiptopeke-Norfolk, Va., ferry, 90 miles from Annapolis, Md., via Chesapeake Bay Bridge, 150 miles from Baltimore, Md., via Elkton, Md., 225 miles from New York, N. Y. We hope you can come to see our stock. It is good driving on the famous Eastern Shore.

Ornamental Stock

A FASCINATING HOBBY

Growing Azaleas is a hobby which provides an ever increasing source of interest. There are so many species to be had and so many almost breath-taking new hybrids being produced, that one is amazed at the magnificent display that we may have with only a small space of ground and a few of the newer plants that are being offered. If you want a stimulating (and profitable) hobby that grows more interesting, beautiful and valuable every year, then grow Azaleas.

Why not offer your customers more of the newer plants? You can make more profit than with the older varieties.

Don't fail to read about Davidia on page 57.

BOXWOOD

Boxwood is another of our specialties and by growing it in the quantities we do, we are enabled to furnish it at these very low prices. This Boxwood is first-class in every way. We have customers who send us repeat orders several times during a season. We know you will like our Boxwood if you will let us send you some of it. **Good Stock, Good Service and Low Prices.**

BUXUS KOREANA, A.A. TYPE. This is probably the hardiest of all the Boxwoods. This strain is entirely different from the above. Propagated from plants sent to us by the Arnold Arboretum many years ago. Foliage a good green both summer and winter; narrower leaves than Sempervirens; slow, spreading grower. We have been selling all our stock to growers who saw it in our nursery.				
* 2 in. pot plants		$2.00	$17.50	
BUXUS MICROPHYLLA var. COMPACTA. New rare, extremely dwarf and hardy Boxwood. Has stood all weather conditions in the Pocono Mountains where temperature drops below zero. Very dwarf and slow growing. Ideal for edging, rockeries, Knott gardens and all uses where plants are required to remain dwarf. Original plant after twenty-eight years, is now about 12 inches high and 21 inches wide. A rare gem. Stock very limited.

*10 to 15 in. trans.		4.00	35.00	
BUXUS SUFFRUTICOSA (Old English Dwarf Box). As a low edging in formal gardens there is no greater favorite than this variety of Box. This is the variety that is so much seen in Washington's gardens at Mt. Vernon and in other noted gardens in Delaware, Maryland, Virginia and other Middle Atlantic States. We have about 50,000 each rooted cuttings and transplants to offer this season.

ALUMINUM SULPHATE

Azaleas, Rhododendrons, Blueberries, Cornus florida, Heather, Kalmia and many other plants require an acid soil. Acid-forming organic matter, such as well-rotted oak leaves helps to increase acidity. Aluminum Sulphate is a good chemical for increasing soil acidity by using ¼ to ½ pound per square yard. Also used for turning hydrangeas blue.

10 lbs. $1.50; 50 lbs. $4.50; 100 lbs. $7.50

Something New: See page 29. We expect these to be much in demand.

CAMELLIA JAPONICA

These Camellias are not hardy here. Can be used outside in the South, but inside here.

HIGH HAT. Beautiful, flesh pink sport of Daikagura. Having all good points of Daikagura, in addition to a most pleasing pink shading. One of the most desirable of the new Camellias.
12 to 15 in. pot grown plants.....$2.50 each

KUMASAKA. Very large, loose peony form to informal double of glowing rose-pink. Profuse bloomer.
12 to 15 in. pot grown plants.....$1.50 each

MATHOTIANA. Very large rose-form, symmetrical, double flowers are deep red. Vigorous compact grower and one of the most popular varieties.
12 to 15 in. pot grown plants.....$1.50 each

PINK PERFECTION. Well known, medium size, formal double of clear pink.
12 to 15 in. pot grown plants.....$1.50 each

CAMELLIA SASANQUA

These handsome flowering evergreens have proven entirely hardy here and we believe they are as hardy as the Kurume Azaleas. They bloom from September until freezing weather. The demand for these plants is increasing about as much as for any plant we grow. Suggest you try them and treat them about as you would the Kurume Azaleas as to soil and culture. For further description ask for our Azalea, Camellia and Rhododendron booklet, no charge.

HOLLY (Ilex)

For many years we have been urging nurserymen to grow more holly. Fifteen years ago there was not very much demand for holly. If you will refer to our catalogs about that time and since you will find we said, "The nurseryman who will grow a collection of Hollies to a specimen size will have something he can sell, whether times are good or whether they are bad. There is always a demand for them, and there will be as long as any other plants will sell."

Try to buy nice holly now, see how scarce it is. We find demand increasing each season.

ILEX Opaca, Arden (Arden Holly)). An American Holly originating north of Wilmington, Del. and selected for its good growing habit, handsome and wonderful fruiting qualities.

3 in. pot plants.....		$5.00	$45.00

ILEX Opaca, Croonenburg. The Wonderful New Holly. In a mature plant the leaves are 2½ to 3¾ inches long and 2 to 2½ inches wide, having about 7 to 9 spines of a very dark green, not having the usual yellowish tint found in the most familiar American Hollies. It bears berries from cuttings almost continuously.

3 in. pot plants.....		$7.00	$65.00

ILEX Opaca, East Palatka. A cross of Dahoon and Opaca. Its evergreen leaves are practically spineless. The deep red berries are borne in heavy clusters, ripen a month or so before Opaca and persist on the tree until spring.

3 in. pot plants.....		$5.00	$45.00

ILEX Opaca, Howard. A named berry-bearing form of American Holly. Small glossy leaves, with an abundance of dark red berries in clusters.

3 in. pot plants.....		$5.00	$45.00

ILEX Opaca Hume No. 1. A vigorous grower, spreading in habit, with large, almost spineless leaves. Bears regularly and the fruit is red and of large size.

3 in. pot plants.....		$5.00	$45.00

ILEX Opaca Hume No. 2. Another cross between Dahoon and Opaca. A stronger grower than East Palatka. Its berries are not so bright, however.

3 in. pot plants.....		$5.00	$45.00

ILEX Opaca Lake City. This is a pyramidal growing type, very heavy fruiter of bright Christmas-red berries.

3 in. pot plants.....		$5.00	$45.00

ILEX Opaca male. A male variety selected for good habit of growth and foliage to use in pollinating female varieties.

3 in. pot plants.....		$5.00	$45.00

ILEX Opaca, Maple Swamp. Good compact grower. Bright red berries.

3 in. pot plants.....		$5.00	$45.00

ILEX Opaca Savannah. A heavy bearing selection, good foliage, good grower.

3 in. pot plants.....		$5.00	$45.00

AUNT MARY'S SWEET CORN

THE SWEET CORN SUPREME

This is the most wonderful Sweet Corn we have ever grown. One grower describes it as "the best Sweet Corn in the world."

Has the most delicious flavor and keeps a long time before becoming too hard to use. In fact, usually requires artificial heat to cure it for seed purposes.

Aunt Mary's Corn, by its excellent quality, sweetness, and flavor makes a stronger appeal to the Corn-loving public than most any other variety and that appeal continues long after you are tired of other Sweet Corns.

Liberal size packets, 35c each; 3 for $1.00, postpaid.

If after growing this wonderful Sweet Corn you are not entirely satisfied, we will refund every cent you paid us for it.

PAINTED WOOD TREE LABELS WIRED

Painted, wired Wood Tree Labels 3½ inches long, which we will furnish as long as they last at $4.10 per 1000.

Why not offer your customers more of the newer plants? You can make more profit than with the older varieties.

TAXUS (Yew)

It is only in the past few years that nurserymen in the United States have begun to really appreciate and grow the Yew. In England there are Yews more than a hundred years old, but unfortunately the English Yew (Taxus baccata) is not reliably hardy in the north, and many do not realize that the Japanese, and many forms of Media, are perfectly hardy in and around Boston, and the Japanese even in northern New England.

They are not so particular as to character of soil except that it should not be too wet, but they do appreciate plenty of good plant food. They are immune to many insect pests and plant diseases so destructive to many other evergreens.

The Yew in its many species and forms can well be used in most all places where any other evergreen will do well.

We honestly believe you will do well to plant and grow on some of these Yews.

We have 6000 two year 3 to 6 in. seedlings grown from seed imported from Japan. These make nice upright single stem plants. At $12.50 per 100, $110.00 per 1000. We potted 7500 of these last winter; they are now 4 to 6 inches tall. At $25.00 per 100, $225.00 per 1000. Better order early if you want them.

Cuspidata densa (Compact Dwarf Japanese Yew). Low form making a dense, sometimes hemispherical bush with ascending branchlets. Most handsome.

* 3 to 4 in. trans.		$4.00	$35.00

Cuspidata, Jeffrey's Pyramidal. A pyramidal- growing type with dark green foliage. Well liked when seen. This is the heaviest berry-bearing yew we have ever seen.

MORE HATFIELD YEWS

The following varieties were grown from stock purchased from the late T. D. Hatfield. He selected these as being the best of his unnamed varieties and we are still carrying them under his original numbers. We are giving brief descriptions.

Media Hatfield No. 2. Real dark foliage, upright grower; very dense; needles medium length. Very good.			
*10 to 12 in. trans.		$4.00	$32.50
12 to 15 in. B&B.	$2.50	23.50	
15 to 18 in. B&B.	3.00	28.50	
Hatfield No. 6. Somewhat like No. 8 in growth but twigs are not as heavy; leaves narrow. Very graceful.			
* 4 to 6 in. trans.		$2.25	$17.50
* 6 to 8 in. trans.		2.75	22.50
* 8 to 10 in. trans.		3.25	27.50
*10 to 12 in. trans.		3.75	32.50
Hatfield No. 7. Bright glossy green, heavy foliage; long needles. A low growing spreading type. Berry bearing.			
* 4 to 6 in. trans.		$2.25	$17.50 $165.00
* 6 to 8 in. trans.		2.75	22.50
* 8 to 10 in. trans.		3.25	27.50

18 to 24 in. B&B.	3.50	33.50	325.00
Hatfield No. 18. Similar in growth to **Taxus cuspidata.** Foliage a shade lighter making it wonderfully attractive. Probably the most rapid grower of all the low types of Taxus. However, it can be kept compact with a little shearing. If you want a good, quick grower, yet one having the good qualities of Cuspidata, we recommend this one.

Tree Peonies

Because of their novelty and great beauty, Tree Peonies are rapidly becoming one of the most desired plants. They bloom earlier than ordinary Chinese Peonies and their flowers are of immense size. These plants are established in 5 inch pots and can be removed safely at any time. See page 55 for varieties and prices.

Berberis Crimson Pigmy

"Little Favorite" Barberry

Two years ago we imported some of these dwarf barberries from Holland. It is one of those real good finds one comes across very seldom. Our four year plants are now about 12 inches wide and eight inches tall. A truly dwarf variety. The old leaves are a rich, lustrous bronze-red, the new growth is a much lighter red. Almost identical in color to a Japanese red maple at its most colorful stage. We know of only one grower in the United States offering these plants, about five to eight inches in diameter. Our price for 2-year pot plants 4 inches and up is $6.00 for 10, $50.00 per 100. Supply limited. We also expect to have to offer next June some rooted cuttings at $12.50 per 100.

Forsythia Lynwood Gold

A New Forsythia from Ireland

This new Forsythia is of a deep yellow color (see colored illustration on third cover page). A good variety to grow with the light yellow "Spring Glory" variety. The golden-yellow flowers simply hide the upright growing branches. For you who want branches for forcing this is one of the best.

2 to 3 ft. plants, 10 for $7.50, 100 for $65.00.

THE MEDIA HYBRID DAY LILLIES

In these Media hybrids we have all the latest colors in red, maroon, mahogany, pink, rose and a few yellows produced by one of the leading Hemerocalis breeders. They are mixed but you are bound to get a variety in each hundred lot. We have several thousand we are offering at $12.50 per 100 or $100.00 per 1000. A very unusual bargain offer.

ROOT GRAFTS

We are again making Root Grafts of stock that is very much in demand at this time. Advise ordering before Christmas if possible as we may not be able to furnish if ordered late. We will make up and reserve for shipment at the time you want them, or will send as soon as we get them made.

FLOWERING CRAB

Price $15.00 per 100. For list of varieties, see page 17.

RED OR PINK FLOWERING DOGWOOD

Price $20.00 per 100

LILACS

Prices of standard varieties $15.00 per 100. See page 16.

Polyethylene Coated KRAFT WRAPPING PAPER

A grease and water resistant wrapping paper coated with Polyethylene which gives much more yardage per pound than does asphalt coated. Comes 36-inches wide, crinkled (crepe) or smooth finish at 15 cents per pound.

BALLING OR PINNING NAILS

For pinning the burlap around the balls of earth. Smooth bright, flat head with a needle point.

Per Keg (100 lbs.) F.O.B. Pittsville—$15.60.

You Should Sell BLUEBERRIES

Easy To Handle. Good Profits

Cultivated Blueberries are hardy shrubs of rare beauty; they are doubly valuable because they are fruitful and ornamental throughout the entire year.

Just loads of delicious berries.

There has developed an enormous demand for these plants especially for fruit. If you have not been getting some of this trade you are missing some good profits. They are easy to grow and handle. Put in a small stock and let us supply you; we will send to you or direct to your customers under your tags.

CABOT. A very early variety. Plants seldom exceed 3 feet in height and make a broad low bush. The color of the new growth in winter is a light red over olive. The large berries have a delicious subacid flavor.

CONCORD. The bush is of upright habit and at maturity exceeds 6 feet in height. The young growth is bright red in winter. The berries are large, frequently reaching three-quarters of an inch in diameter. They usually ripen a few days earlier than Rubel and are very fine in flavor.

JERSEY. The bush is of vigorous habit and grows very large. The winter color of the young growth is a light red over golden brown. The berries are among the very largest, light blue, and ripen about the same time as Rubel.

JUNE. A little earlier than Cabot. Berry is large, of medium blue color, sweet and delicious when fully ripe, with a slight subacidity. Newer and probably better than Cabot.

PIONEER. A very fine variety ripening about one week later than Cabot. The bushes are stocky, seldom exceeding 4 feet in height, with a tendency to be broad rather than high. Its stems are stout and stiff, and the winter color of the new growth is a delightful red. Pioneer produces heavy crops of berries close set in the cluster. They are larger than Rubel, of a medium blue color and fine flavor.

RANCOCAS. The bush of slender, vigorous, upright habit rarely surpasses 5 feet in height. The winter twigs are dark red. The berries are somewhat larger than those of Rubel and begin to ripen several days earlier.

RUBEL. A vigorous, productive variety. Well-developed bushes stand 6 feet high and the winter color of the young wood is a rich red. The large berries of fine color are usually ready to pick the first week in July.

As Good As Can Be Grown

We are exerting effort to produce the very best stock that can be grown, and in our forty-five years' experience we believe we have never offered bigger values than we are offering this season. Even with the short supply of Lining-Out stock we have kept our prices at a low level. We feel sure you will be more than pleased with the stock we send you if you give us your order.

We try to secure our propagating wood from only the very best type of plants, and by doing this we can furnish you stock that should be of the best that it is possible for you to get anywhere, regardless of price.

HARDINESS OF PLANTS. When hardiness of plants is mentioned herein it applies only to this section unless otherwise mentioned.

Azaleas

We have prepared a booklet describing more fully the Azaleas, Camellias and Rhododendrons listed herein. You will note we are only giving a one-line description in this price list. This is done to save space. We will be glad to send you the booklet above referred to if you will tell us you want it. No charge for it.

Azaleas have been one of our specialties for many years. This season we are pleased to offer the largest stock we have ever grown, and at reduced prices, too. If you have not been getting your Azaleas—Lining-Out or Specimen—from us, we wish you would try ours this season. We aim to please you with Azaleas as well as with our other stock.

KURUME AZALEAS

The Kurume Azaleas are one of the most showy of all flowers for the garden. They are also well adapted to forcing —thousands of them being sold for Easter, Mother's Day and Decoration Day. They are comparatively easy to grow and make such a wonderful display that the demand is constantly increasing. Many of the varieties are hardy out-of-doors as far north as Long Island. They are extremely floriferous, and in season the blossoms completely cover the plants. The colors are almost every hue and shade except yellow, as you will find below.

GABLE'S HARDIER AZALEAS

Mr. Joseph B. Gable of Pennsylvania has spent almost a lifetime working with Azaleas and Rhododendrons. Many years ago he started breeding azaleas with the hopes of producing a hardier type of evergreen azalea in a good color range than then available. He has had wonderful success and is now recognized as the leader in this field.

You who have been getting our catalogs for the past fifteen years have seen how successful his efforts have been and there are many more of his later productions following as soon as sufficient stock can be produced.

We are very proud that Mr. Gable has furnished us with these new creations as soon as he had the stock to offer and we know from the reports we have received from our customers that his hopes have been more than realized.

As to hardiness: these varieties will average hardier than Hinodegiri and Amoena and much hardier than the other Kurumes. All have lived and flowered in the open field where they have withstood temperatures of twenty below zero and more in the past few winters with only negligible injury to a few. Most of them were uninjured.

ROSE GREELEY (D3G). Mr. Gable says: "We believe we have produced in this, that hardy white we have been looking for. The color is pure except for very faint trace of yellow in the throat, are of good size and substance and the plant of good compact, branching habit." Hose-in-hose. We are recommending this to take the place of Snow where Snow is not hardy. Rose Greeley may not prove hardy in many sections but we believe it well to try it for a low growing white.

VESUVIUS

At the present time we are growing over 800 named varieties of Azaleas, besides many unnamed ones. If you want to contract ahead for your wants, let us know.

HINODEGIRI. The most Popular Azalea

AZALEA, OTHELLO (Kaempferi)

5 CLEOPATRA 6 PURPLE SPLENDOR (Gable)

AZALEA MACRANTHA FLOREPLENA

KAEMPFERI HYBRID AZALEAS

In these new Kaempferi Hybrids—the result of crossing Kaempferi and Malvatica—there has been obtained the hardiest type of evergreen Azalea, with a good range of form and color in the flowers so far achieved. Several years' tests have demonstrated that these new Hybrids are just as hardy as Kaempferi, until now the hardiest of the evergreen sorts. In connection with these Hybrids we suggest you try out the new Gable varieties we are offering.

CHUGAI HYBRID AZALEAS

A new group from the Chugai Nursery Co. near Osaka, Japan. These are late flowering. Flowers are usually variegated, white or pink ground with red, lilac or purple stripes, white base with colored margin, or purple with white variegation and edge. We do not recommend these for northern sections. They are hardy here. We have many more varieties of these in small lots.

ARNOLDIANA AZALEAS

In 1914, the late Jackson Dawson, then superintendent of the Arnold Arboretum, at Boston, Mass., created a splendid new type of hardy Azalea by crossing Azalea Kaempferi and Azalea Amoena. Of the seedlings thus produced a considerable number of them were grown at Boston from their infancy until flowering age, when the following ones of unusual beauty and vigor of growth were selected.

These Arnoldiana Azaleas have done exceptionally well in Indianapolis, Indiana, and we can recommend them for trial in similar soils and conditions.

BRIARCLIFF. Deep rich reddish pink.

GROWING GOOD AZALEAS

Azaleas will grow in full sun or in shade. In the sun you will have brighter colors and growth will be shorter. We prefer a little shade if convenient. The small pot-grown plants should be planted about ten or twelve inches apart in a prepared bed consisting of about equal parts of good acid soil and peat moss or rotten leaf-mold, with about one-half shade.

Azaleas like acid soil with plenty of peat moss or leaf-mold in it. As a fertilizer rotten cow manure, cotton-seed meal and tankage are good. Use this in early spring and keep well mulched with peat moss or leaf-mold and keep the plants well watered during dry weather.

For scale and red spider use Volck, one to fifty.

If your soil is not acid enough we suggest you use Aluminum Sulphate. This, we can furnish at 10 lbs. $1.50; 50 lbs. $4.50; 100 lbs. $7.50.

VUYKIANA AZALEAS

A new race of very large flowered Japanese Azaleas, produced by crossing hardy Azalea Malvatica hybrids with Azalea Mollis. Sturdy growers, prolific bloomers. From the information we have they are much hardier than the Kurume Azaleas. Flowers range from 2 to 2½ inches. All bloom late midseason. Plants grow tall.

	Each	10	100	1000
BEETHOVEN. Single flowers, reddish-violet.				
* 2 yr. field beds XX trans...		$4.00	$35.00	
* 3 yr. field beds XX trans...		5.00		
JOHANN STRAUSS. Single, rose flowers, blotched.				
* 3 yr. field beds XX trans...		$5.00	$45.00	
PALESTRINA. We are recommending this to use in place of Ledifolia Alba for a tall growing white bloomer. Last season when Ledifolia Alba were both bud and bloom killed, Palestrina came through without any wood damage and plenty of white flowers. Try it for a hardier tall white.				
* 2 in. pot plants.....		$2.50	$20.00	
* 3 yr. field beds XX trans...		5.00	45.00	
10 to 12 in. B&B.....	$1.75	16.50

SIBELIUS. Single. Orange-red with chocolate blotch.				
* 2 yr. field beds XX trans...		$4.00	$35.00	

MISCELLANEOUS AZALEAS

In the following list of Azaleas you will find many species; they are not classified or separated as to their different species. We are trying to give such descriptions that you may know, or have a general idea what each variety is like. 2-yr. seedling Azaleas are not as large as our 2-year Azaleas grown from cuttings. S. following size signifies seedling.

A FASCINATING HOBBY

Growing Azaleas is a hobby which provides an ever increasing source of interest. There are so many species to be had and so many almost breath-taking new hybrids being produced, that one is amazed at the magnificent display that we may have with only a small space of ground and a few of the newer plants that are being offered. If you want a stimulating (and profitable) hobby that grows more interesting, beautiful and valuable every year, then grow Azaleas.

PAINTED WOOD TREE LABELS WIRED

Painted, wired Wood Tree Labels 3½ inches long, which we will furnish as long as they last at $4.10 per 1000.

GLENN DALE AZALEAS

The Division of Plant Exploration and Introduction at the Glenn Dale Plant Station began introducing, in 1941, a group of selected seedlings from their own crosses. We have been growing and propagating these plants since then and we are now offering them to the trade.

The purpose of this breeding work was to obtain a class of winter-hardy Azaleas that would have as large and varied flowers as those of the "Indian Azaleas" which are not hardy in this section. Mr. B. Y. Morrison, who has been leading in this work, has done a wonderful job, not only in producing large size and varied colors but also has bred the hardiness into the plants. These plants are most interesting. The flowers run to over 5-inches across and include both self-colored and variegated. The plants are mostly excellent growers and do well here, and from all appearances will grow well in much colder sections.

When I was told they had some blooms that would run over 5-inches across I could hardly believe it but, it is so. I have seen them, and I hope to offer some of the plants in another season or two. We only have a small quantity of some varieties, but hope to get all varieties distributed in as large an area as possible so we may have information as to how they grow generally throughout the country. If you get some of these we will appreciate knowing how they grow with you. We suggest you give these a trial.

The following descriptions were furnished us by Mr. Morrison and are based upon the original material as grown at Glenn Dale, Maryland, and give as figures for heights those of the original plants, all between 15 and 20 years old, under normal development except for the removal of propagating wood during a two season period.

The number following variety name is the Glenn Dale Station number.

Sometimes when Azalea flowers are described as striped or flaked on white they will appear as a solid color. When this occurs the branch should be cut out. This seems inherent with the variety—not any fault of the nurseryman.

Blooming dates are for vicinity of Washington, D. C. in a normal season.

Grafting Is Easy

You have often wanted to propagate some plants of a scarce or high priced variety but did not have the proper facilities to do it with. With a new outfit we are offering, you can do it yourself, as easily as making an old-fashioned graft. You take a branch of the shrub or tree you wish to graft, (leaving it on the parent plant) girdle the branch or twig, put damp peat moss or damp sphagnum moss around the girdled part and wrap it tightly with this new waterproof plastic (in sheets) and tie it, top and bottom, with rubber bands. Generally within six to eight weeks the twig is rooted ready to pot. It requires no watering or other attention until ready to pot. Complete outfit (enough plastic sheets and rubberbands to make 100 grafts) with complete instructions how to do the grafting, for $5.00 postpaid.

AZALEAS—Kinds and Culture
By H. Harold Hume

This new book, written by an outstanding authority presents a wealth of up-to-date information on Azaleas. All details in the successful growing of Azaleas are carefully explained. Describes typical soils; how to grow them to the most favorable condition; best method of planting and growing on; how to feed, mulch and water them; control pests and insects and various methods of propagating them. Beautiful full color and black and white plates. Worth many times its cost of $4.50 postpaid.

COLORED PLATE BOOK

This is a very handy plate book to show your customers colored illustrations of over 250 nursery items with brief descriptions. Price, $2.00 each.

PRINTING

After selling our printing department five years ago, one of the young men (Charles L. Parker), who had been working for us decided to start a printing business of his own. He will be very glad to quote on any work you may want done. With much pleasure I recommend him and am sure you will find him reliable in every way, and we both will appreciate any order you may place with him. Send all correspondence about printing direct to

PITTSVILLE, MD.

NURSERY SPADES

It now looks as if nursery spades will again be scarce and impossible to get. We have had an order in with one manufacturer for over six months and have not gotten them yet. We are offering the ones we now have as long as they last.

No. A3M. This is the standard light weight (5½ lbs.) nursery spade, 7½ in. tapered to 6 in. wide at bottom, and 12 inches long; handle has two-thirds length (15 in.), straps, turned over steps. $6.50 each.

No. A13. A heavier (7 lb.) spade than above with a 13 in. tapered blade and full length straps. This spade is for heavy digging. $8.00 each.

ALUMINUM SULPHATE

Azaleas, Rhododendrons, Blueberries, Cornus florida, Heather, Kalmia and many other plants require an acid soil. Acid-forming organic matter, such as well-rotted oak leaves helps to increase acidity. Aluminum Sulphate is a good chemical for increasing soil acidity by using ¼ to ½ pound per square yard. Also used for turning hydrangeas blue.
10 lbs. $1.50; 50 lbs. $4.50; 100 lbs. $7.50

The Sasanqua Camellias we are offering on page 7 are really wonderful in sections where Kurume Azaleas will grow. Your customers are going to want them. Better start growing them right away.

GROW CHESTNUTS

WITH THE BLIGHT RESISTANT ORIENTAL VARIETIES

Most people know that a terrible scourge (blight) has befallen our native Chestnut tree, but many do not know that the Oriental species are resistant to this blight. We had nineteen burrs averaging three nuts each on a tree 40 inches tall. These trees are not as tall growing as was our American species, but grows more spreading, making a round top tree.

There is very much interest in these foreign species and we are very fortunate in having a nice supply to offer this season.

Tree Peonies

Because of their novelty and great beauty, Tree Peonies are rapidly becoming one of the most desired plants. They bloom earlier than ordinary Chinese Peonies and their flowers are of immense size. These plants are established in 5 inch pots and can be removed safely at any time.

AUNT MARY'S SWEET CORN

THE SWEET CORN SUPREME

This is the most wonderful Sweet Corn we have ever grown. One grower describes it as "the best Sweet Corn in the world."

Has the most delicious flavor and keeps a long time before becoming too hard to use. In fact, usually requires artificial heat to cure it for seed purposes.

Aunt Mary's Corn, by its excellent quality, sweetness, and flavor makes a stronger appeal to the Corn-loving public than most any other variety and that appeal continues long after you are tired of other Sweet Corns.

Liberal size packets, 35c each; 3 for $1.00, postpaid.

If after growing this wonderful Sweet Corn you are not entirely satisfied, we will refund every cent you paid us for it.

Air Layering Plants

You have often wanted to propagate some plants of a scarce or high priced variety but did not have the proper facilities to do it with. With a new outfit we are offering, you can do it yourself, as easily as making an old-fashioned graft. You take a branch of the shrub or tree you wish to graft (leaving it on the parent plant), girdle the branch or twig, put damp peat moss or damp sphagnum moss around the girdled part and wrap it tightly with this new waterproof plastic (in sheets) and tie it, top and bottom, with rubber bands. Generally within six to eight weeks the twig is rooted ready to pot. It requires no watering or other attention until ready to pot. Complete outfit (enough plastic sheets and rubberbands to make 100 grafts), with complete instructions how to do the grafting, for $5.00 postpaid.

EMBOSSED ZINC LABELS

We will make from your list of varieties, Embossed Zinc Labels, ½ inch wide at 7c each in any quantity desired. These Labels will permanently identify your plants.

HORTICULTURAL PEAT MOSS

Very fine, clear, highly absorbent. Burlapped bales. $4.90 each, while present stock is available. This is the kind we use for propagating.

Davidia is very unusual. See page 57.

SOME MORE GOOD BOOKS

TREES FOR AMERICAN GARDENS.
Donald Wyman. $7.50.

If we could afford to give each of our customers a book of general interest to nurserymen it would be this one, or its companion volume, "Shrubs and Vines for American Gardens," by the same author. We can't, but we suggest you purchase one or both. With the knowledge you will gain you will be able to answer almost all questions asked you about all the most desirable trees.

THE NEW BOOK OF LILIES. Jan de Graaff. $3.50.

All you want to know about the selection and culture of lilies by this world-renowned grower. Describes the origin and development of more than 200 varieties. Fascinating chapters on how lilies multiply, how new types are made—reports on Mr. de Graaff's own work. Tells all about stem and base-rooting, how to propagate super lilies—how to avoid and cope with trouble—how to select good bulbs—best locations and soils—how to grow indoors in pots. 192 pages. 17 full color photographs, 12 pages of drawings.

PRINCIPLES OF WEED CONTROL. $5.50.

The book brings forth the principles, facts and techniques of scientific weed control. In addition, the authors discuss soil sterilants, chemical and mechanical methods of defoliation, ground spraying methods, airplane sprayers and flame throwers.

HOLLIES.
H. Harold Hume. $6.75.

Nurserymen and gardeners (amateur and professional) all have been waiting eagerly for a book of this sort. This is the most complete book on Hollies ever published.

In this book is the help and information as to varieties, propagation, planting, culture and orcharding of Hollies.

The many varieties of American, English, Chinese and Japanese are fully described and discussed. Many black and color illustrations. Price $6.75.

A BOOK WE RECOMMEND

THE HOW AND WHY OF BETTER GARDENING.
Laurence Manning. $3.00.

This book will show you how to grow better flowers, fruit, shrubs, trees and vegetables, because it contains the basic principles of plant science, described in an easy-to-read way every gardener can understand and use.

"Mr. Manning has the almost unique quality of being at the same time highly instructive and enormously entertaining. He entertains while teaching and teaches while entertaining. Once I'd started 'The How and Why of Better Gardening' I found myself virtually incapable of putting it down, and I'm sure that countless other gardeners who start it—beginners and old-hands alike—will find themselves in the same predicament."—Theodore A. Weston, Editor, "Flower Grower Magazine."

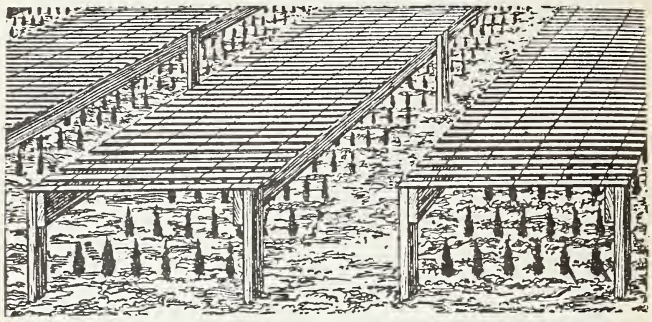
Davidia Involucrata (Dove Tree)

One of the rarest really good trees in the United States today.

This is the tree the late Ernest Wilson spent months looking for in the heart of China. After seeing it in bloom he said, "I am convinced that Davidia Involucrata is the most interesting and most beautiful of all trees which grow in the north temperate regions." The beauty of the Davidia is in the two snow-white bracts which are always unequal in size—one usually six inches long by three inches broad, the smaller three and one-half inches by two and one-half inch. At first greenish, they then turn pure white as the flowers mature. They are pendulous on fairly long stalks and when stirred by the slightest breeze they resemble small doves nestling among the trees. 3 to 4 ft. at $17.50 each.

EMBOSSED ZINC LABELS

We will make from your list of varieties, Embossed Zinc Labels, ½ inch wide at 7c each in any quantity desired. These Labels will permanently identify your plants.



This shows one way to use this shading. We stretch wires over beds about 16 inches from ground.

Woven Lath Shading

Our woven lath shading is an efficient and economical material for the protection of newly set rooted cuttings, seed beds and small seedling transplants. It protects them from the hot rays of the sun and strong and destructive winds.

The construction of the beds is simple. You can use narrow boards (4 inch) nailed on small stakes (2 x 2 inches or 1 x 4 inches), or you can do as we do. We stretch two wires three feet apart over a four foot bed (this will leave the lath shading extending over each wire six inches. This makes it easy to roll and unroll the shading without rolling off the wires. The wires are placed about 16 inches from the ground, thus giving the small plants plenty of room to grow before reaching the shading.

This Woven Lath Shading is easily handled, and when not in use you just roll it up and store away until ready to use it again.

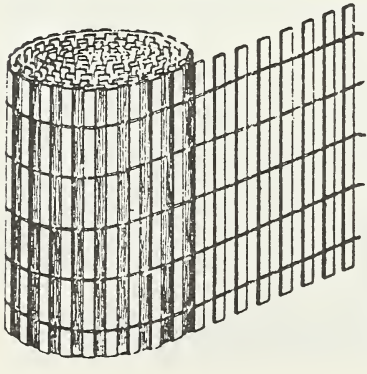
The laths or pickets are approximately ⅝ inch thick x 1½ inch wide and 4 ft. long and are woven with five double strand 12½ gauge galvanized wire, spaced about the width of a lath apart, thus giving the small plants about one-half shade.

This Woven Lath Shading is painted with a solution of red mineral oxide, greatly extending the life and use of the shading.

It is made in rolls of 50 and 100 feet. Can be easily handled by one or two persons.

It is also useful for making fences, to protect new plantings of grass and shrubbery around parks and fields and many other uses you may find for it. Can be easily rolled up again at any time and stored in a small space for future use.

A little investment in proper protection of tender and newly planted plants may save you many tedious hours of labor, considerable expense and may even save you an entire season's growth of your valuable plants.



Why take chances of sun ruining your plants? You can get over 3,000 plants under 100 foot roll when planted 4 in. apart each way.

Another big advantage of using this Woven Lath Shading is that you can water your plants even while the sun is shining hot on them. This means a lot in continued dry weather. Price: Up to 500 ft. at 23 cents per running foot, over 500 feet at 22 cents per running foot. Large quantities specially priced.

Root Cuttings
better and quicker
with
THE PLANT HORMONE POWDER

ROOTONE

Just Dust and Plant
No Solutions No Waiting No Watching

We recommend ROOTONE because we have found it of much help to us in rooting cuttings, both in saving of time and in increased roots to the cutting. We use it on all the cuttings we plant. We know it pays us both in better roots and time saved in cutting beds.

ROOTONE is Best for Cuttings Because —

LOW COST. Can treat 30 to 50 cuttings for one cent.
SIMPLICITY. No skill is needed to apply ROOTONE. No measurements, no vials, no elaborate charts to follow, or clock-watching are needed. Just dip in dry powder and plant.
SPEED OF ROOTING. The time of rooting of cuttings is cut by ROOTONE treatment to anywhere from one-half to one-tenth of the time required without treatment.
SURENESS OF ROOTING. Cuttings that root with difficulty, such as holly, magnolia, arborvitae, lilac, and dogwood will respond in greatly increased percentages and in shorter time.
ROOTONE is a general stimulant for plants, supplying extra hormone at times when the plant is able to use more than nature provides.
ROOTONE treatment hastens and improves the rooting of cuttings; hastens germination from seeds and bulbs, resulting in earlier flowering.

2-oz. jar $1.00; 1-lb. can $5.00 postpaid

A two-ounce jar will treat up to 3000 cuttings; pound will treat up to 40,000 cuttings.
No solution or soaking treatment is necessary. Just dip the base of the cutting in dry powder and set in the propagating bed or cold frame.

TRANSPLANTONE

TRANSPLANTONE HELPS SAVE PLANTS

If you have been having trouble in transplanting some of the harder to get to live plants we suggest you try using "Transplantone," The Vitamin Hormone Stimulant For Plants. We understand it has given wonderful results even on Canadian Hemlock collected seedlings. We all know how difficult it is to get a fair percentage of them to live. A three oz. package will treat several thousand plants. All you do is dip the cuttings in water where the Transplantone is mixed. 3 oz. can $1.00, 1 lb. can $4.00, postpaid.

BLUEBERRIES

There has developed an enormous demand for these plants, both for fruit and ornamental purposes. If you have not been getting some of this trade you are missing some good profits. They are easy to grow and handle. Put in a small stock and let us supply you; will send to you or direct to your customers under your tag.

ALUMINUM SULPHATE

Azaleas, Rhododendrons, Blueberries, Cornus florida, Heather, Kalmia and many other plants require an acid soil. Acid-forming organic matter, such as well-rotted oak leaves helps to increase acidity. Aluminum Sulphate is a good chemical for increasing soil acidity by using ¼ to ½ pound per square yard. Also used for turning hydrangeas blue.
10 lbs. $1.50; 50 lbs. $4.50; 100 lbs. $7.50
